The CRAFT Table

Table for young children with attached seats

Comfortable for an average-size adult as well

Perfect for daycares and child care centres

This wonderful little table can easily accommodate 8 or even 12 children! In addition to being both light and sturdy, this table's slightly textured surfaces hide scratches without taking away from the fun of drawing or colouring on a piece of paper.

Its corrosion-resistant aluminium base supports the high-density polyethylene (HDPE) seats and tabletop. All these materials are available in an incredible selection of bold or neutral colours to suit your tastes.

Easy to move and very stable, this table can be permanently attached to the ground using anchoring plates attached directly to its frame.*

Jambette's craft table is also equipped with an opening in the centre of the tabletop for an umbrella.

LA-15001
