for the little ones
at day care**

**Fantastic splash pad
that connects right to
your outdoor tap and
can usually be installed
in one day**

Jambette.COM

THE BEST SPLASH PAD SURFACE ON THE MARKET

Imagine children playing on a surface that provides comfort and flexibility, while absorbing their slight unsteadiness. Made of a rubber and polyurethane cushioning material, this surface is UV-resistant and offers unparalleled durability.

The surface has a honeycomb structure underneath allowing room for piping and water drainage. This high-end product can be placed on a hard surface such as asphalt or on ground previously prepared and levelled.

Toddler-Splash 2

Model	Age group	Capacity	Surface dimensions

- 1 Fan spray nozzle
- 2 Directional spray nozzles
- 2 Drizzle spray nozzles

WORRY-FREE PIPE SYSTEM

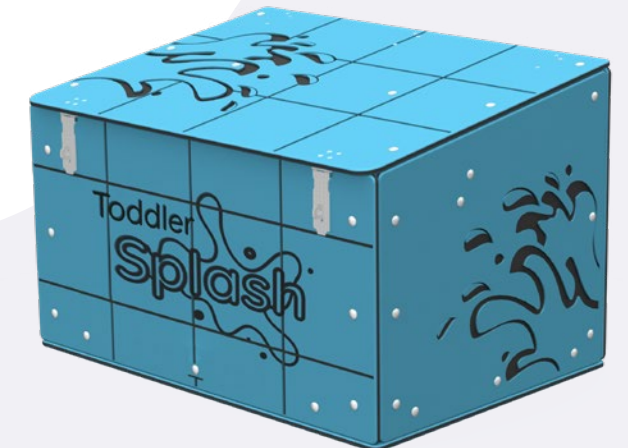

The pipe system under the rubber surface is commercial grade and recommended for this type of installation. All connections are high end quality "quick plug" type. All nozzles are made of HDPE polyethylene thus guaranteeing excellent durability. When fall arrives, you have everything you need to ensure worry-free winterization of your pipes, thus allowing an easy start-up the following season.

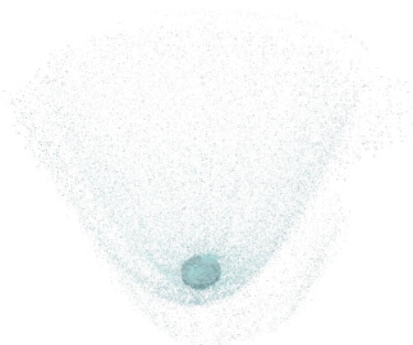

CONTROL CABINET

(Only on models WS-20002C, WS-20001C, WS-20000C)

Jambette's Toddler-Splash pad is designed for the realities of day care centres, and the Toddler-Splash control cabinet will provide you with extra peace of mind. In fact, the water flow and pressure from the outside tap of your building (garden tap) may fluctuate for various reasons, such as human activity inside the building and the use of household appliances. The Toddler-Splash Cabinet is equipped with an industrial-quality ultra-quiet automatic pump that regulates the water pressure and flow before it is propelled toward the nozzles, thus ensuring that your splash pad functions optimally. Also in this cabinet is a hose and an electrical extension, both 15 metres (50'), for connections to the building using quick connect systems. In addition, the winterization kit and instructions are included there. And there is still room in the cabinet to store accessories, toys, and anything you want!
