IMAGINE VOLTE

High-density super climber!

Volte is a super climber that offers many possibilities to little adventurers who want to climb, hang or simply feel the wind on their face.

The uniquely versatile Volte can accommodate up to 40 children. It has a presence that allows it to be installed alone on a playground, placed in combination and complemented by additional elements to multiply the challenges or integrated into a play structure to add an exclusive climbing feature.

COMPONENTS OF THE VOLTE STRUCTURE

The main structure of the Volte is comprised of six 5"-diameter aluminium tube posts that form a circle around a central post. Attached to these posts at various angles are all the following play elements:

- A** 3 aluminium tube frames equipped with cable nets
- B** 3 aluminium tube frames equipped with HDPE panels with openings and handles
- C** 3 triangular cable nets including a small HDPE surface
- D** 3 cable crossings
- E** 4 sets of belts (hammock) comprised of three rubber strips each
- F** 3 HDPE support handles
- G** 3 aluminum tube support handles
- H** 3 HDPE foot grips
- I** 4 translucent resin decorative post toppers

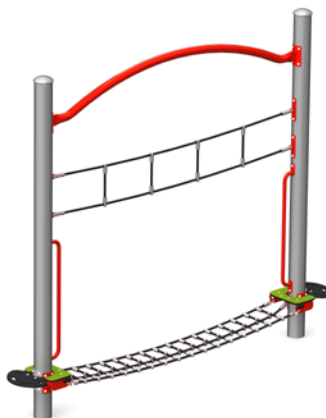

ALONE OR IN COMBINATION, VOLTE PACKS A BIG WOW FACTOR!
