**IMAGINE**

## **Equilibra**

**It's like a buoy that floats along the waves of the sea. Plenty of fun for young adventurers!**

Children are sure to enjoy swaying away on this playground product and socializing, while stimulating the development of their ear vestibular system.

**Jambette**.com

Three coil springs developed specifically for Jambette by a major Canadian manufacturer provide the rocking motion of Equilibra. They are pinch-free for hands and feet. The top end of each spring is fastened to the underside of the equipment platform, while the bottom end is secured to the underground anchoring system by simple design mounting brackets that stand the test of time.

The all-aluminum double central mast is fitted on top with a comfortable polyethylene part that serves as a handle children can hold on to while swaying.

## Equilibra

MODEL	AGE GROUP	CAPACITY	SURFACE AREA REQUIRED	CSA AND ASTM FALL HEIGHT
LA-22003	18 months to 12 years	4 children	18' x 18' / 5.5 m x 5.5 m	1' 3" / 0.4 m
