Silla-2 Rocker

A teeter totter with lots of character!

The pleasant yet secure rocking motion of the Silla-2 equipment feels fun with just the right amount of excitement. With safety in mind, the comfortable cradle seats designed to support the body make this playground product accessible to young and old with impaired mobility.

Jambette.com

A new teeter totter accessible to the impaired mobility clientele

Two coil springs developed specifically for Jambette by a major Canadian manufacturer provide the rocking motion of the Silla-2 rocker. They are pinch-free for hands and feet. The top end of each spring is fastened to the underside of the equipment platform, while the bottom end is secured to the underground anchoring system by simple design mounting brackets that stand the test of time.

The tubing structure supporting the high-density polyethylene (HDPE) panels is made of aluminium.

Silla-2 Rocker 

MODEL	AGE GROUP	CAPACITY	SURFACE AREA REQUIRED	CSA AND ASTM FALL HEIGHT
L-21078	18 months to 12 years	2 children	21' x 15' / 6.4 m x 4.6 m	1' 6" / 0.5 m
