

IMAGINE

Gondola

Rocking on the patio while enjoying the summer breeze with your best friends; a situation that may seem simple for some, but turns out to be a memorable experience for others.

The platform's moderate pendulum motion provides a pleasant rocking sensation that encourages the development of the vestibular system. The gondola has plenty of space for a wheelchair, along with the two bench seats with backrest. A side table completes the layout to provide a comfortable and warm environment. Finally, a gently sloped access ramp ensures effortless access. A unique, inclusive and intergenerational product.

Jambette

Movement is provided by a system of levers located under the platform. The system is made of ultra-strong steel and mounted on maintenance-free sealed bearings made of steel. Firmly anchored to the ground in concrete, this mechanical assembly – inaccessible to unauthorized persons – offers rock-solid reliability for years of peace of mind.

Gondola

MODEL	AGE GROUP	CAPACITY	CSA SURFACE AREA	ASTM SURFACE AREA
L-21027-5AB	18 months to 12 years old	13 children	33' x 23' / 10 m x 7 m	33' x 21' / 10 m x 6.4 m
